

CSC442 Meeting Notes

Date: January 22nd

Attendees: Saumya Gangwal, Ryan Hinshaw, Peter Ising, Mounir Arayssi

Topic: CSC442 Course Project HW5

The group met to discuss potential project topics and agreed on focusing on basketball statistics. Baseball was considered but ultimately not chosen.

Key Takeaways:

- Decided to work on basketball statistics
- Considered baseball but chose basketball as the primary focus

Next Steps:

- Brainstorm specific aspects to explore
- Assign initial research tasks
- Schedule the next meeting to refine the project scope

February 9th Meeting:

- Prepared for the February 10th meeting with the professor
- Worked on the dataset and explored potential sources
- Reviewed basketball statistics on Basketball-Reference.com and Kaggle

February 13th Meeting:

- Worked on selecting and preparing datasets
- Decided to finalize the dataset before meeting the professor for part 5a
- Discussed dataset structure, ensuring it met project criteria
- Explored potential sources and evaluated dataset quality
- Assigned tasks for dataset acquisition and preliminary assessment
- Re-prepared based on notes received from the professor during the February 10th meeting
- Prepared for the February 14th meeting to finalize the 5a dataset

February 21st Meeting:

- Focused on cleaning and wrangling the datasets
- Addressed missing values and inconsistencies
- Dataset Considerations:

We collaborated on all the other tasks through our iMessage group, using Google Drive to store our work. Eventually, we uploaded everything to GitHub to complete the project and submit it on time.
